MAY KEY POINTS

TREND ESTIMATES

EMPLOYMENT

- increased to 9,302,700.

UNEMPLOYMENT

- decreased to 619,600.

UNEMPLOYMENT RATE

- decreased to 6.2%.

PARTICIPATION RATE

- decreased to 63.6%.

SEASONALLY ADJUSTED ESTIMATES

EMPLOYMENT

- increased by 44,400 to 9,305,200. Full-time employment increased by 75,300 to 6,720,700 while part-time employment decreased by 30,900 to 2,584,400.

UNEMPLOYMENT

- increased slightly to 622,500. The number of persons looking for full-time work decreased by 8,900 to 464,500 and the number of persons looking for part-time work increased by 9,800 to 158,000.

UNEMPLOYMENT RATE

- remained steady at 6.3%. The male rate decreased to 6.6% and the female rate increased to 5.9%.
- NSW 6.1% (6.0% last month), Vic 5.7% (5.7%), Qld 7.5% (7.6%), SA 6.6% (6.6%), WA 6.5% (6.3%), Tas 8.5% (8.0%).

PARTICIPATION RATE

- increased by 0.2 percentage points to 63.6%.

ROUNDING

Estimates of monthly change shown on page 1 have been calculated using unrounded estimates, and may be different from, but are more accurate than, movements obtained from the rounded estimates. The graphs on page 1 also depict movements calculated from unrounded estimates.

SAMPLING ERRORS

The estimates in this publication are based on a sample survey. Because the entire population is not enumerated, the published estimates and the movements derived from them are subject to sampling variability. Standard errors give a measure of this variability and appear on pages 31 and 32.

The 95% confidence intervals below provide another way of looking at the variability inherent in estimates from sample surveys. The interval bounded by the two limits is the 95% confidence interval. A 95% confidence interval indicates that we are 95% confident that the upper and lower limits enclose the true value of the estimate.

| SEASONALLY ADJUSTED DATA SERIES | MOVEMENTS APRIL 2002 TO MAY 2002 | | | |
|------------------------------------|-------------------------------------|-------------------------|----|---------|
| | Monthly change | 95% Confidence interval | | |
| Total employment | 44 400 | 7 800 | to | 81 000 |
| Total unemployment | 900 | -13 100 | to | 14 900 |
| Unemployment rate | 0.0 pts | -0.2 pts | to | 0.2 pts |
| Participation rate | 0.2 pts | 0.0 pts | to | 0.4 pts |

Acting Australian Statistician

PRINCIPAL LABOUR FORCE SERIES: Trend estimates

EMPLOYED PERSONS

The trend estimate of employed persons generally rose from a low of 7,634,000 in January 1993 to 9,126,300 in September 2000. While the trend fell slightly to 9,113,100 in December 2000, it has since risen to stand at 9,302,700 in May 2002.

UNEMPLOYED PERSONS

The trend estimate of unemployed persons peaked at 920,600 in September 1993, before falling rapidly to 728,100 in July 1995. The trend then rose slowly, reaching 771,600 in February 1997 before falling to 591,800 in September 2000. The trend then rose to 678,000 in October 2001, before falling to stand at 619,600 in May 2002.

UNEMPLOYMENT RATE

After reaching a high of 10.7% in late 1992, the trend unemployment rate remained steady for twelve months, before falling rapidly to 8.1% in July 1995. The trend then rose slowly until February 1997, before falling to 6.1% in September 2000. The trend rate then rose to 6.9% in October 2001, before falling to 6.2% in May 2002.

EMPLOYED PERSONS: Trend estimates

EMPLOYED MALES

TOTAL

From a low of 4,391,200 in January 1993, the trend estimate of employed males rose to 5,116,100 in September 2000. The trend then fell to 5,095,700 in March 2001, before rising to stand at 5,201,200 in May 2002.

MALES EMPLOYED FULL TIME

Apart from a flat period between June 1995 and June 1997, the trend estimate of males employed full-time rose strongly, from 3,938,900 in December 1992 to a peak of 4,451,000 in August 2000. The trend then fell until July 2001, before rising to 4,453,800 in May 2002.

MALES EMPLOYED PART TIME

The trend estimate of males employed part-time has risen 62% over the last 10 years, rising from 461,000 in May 1992 to 747,400 in May 2002. The trend estimate showed strong growth during 2001, reaching 735,400 in August 2001, before showing slower growth in recent months.

EMPLOYED PERSONS: Trend estimates

EMPLOYED FEMALES

TOTAL

The trend estimate of employed females rose strongly from 3,242,800 in January 1993 to 3,582,100 in July 1995. Since then the trend has continued to rise at a slower rate and stood at 4,101,500 in May 2002.

FEMALES EMPLOYED FULL TIME

The trend estimate of females employed full-time rose strongly from 1,865,100 in August 1992 to 2,065,600 in September 1995. The trend then remained relatively flat until July 1997, before rising to 2,276,800 in February 2001. Since then it has fallen to stand at 2,240,800 in May 2002.

FEMALES EMPLOYED PART TIME

Apart from a small decrease between August 1992 and March 1993, the trend estimate of females employed part-time has risen steadily over the last 10 years. In May 2002 the trend estimate was 1,860,700, 36% higher than the May 1992 estimate of 1,368,300.

(a) Trend estimates for November 2001 to April 2002 have been revised. Estimates for the most recent three months may be subject to significant revisions as data for later months become available.

EXPLANATORY NOTES

INTRODUCTION

1 This publication contains preliminary estimates of the civilian labour force derived from the Labour Force Survey component of the monthly population survey. Estimates for the current month are preliminary and subject to revision. Revised estimates for the current month and more detailed estimates will be published in *Labour Force, Australia* (Cat. no. 6203.0).

CONCEPTS, SOURCES AND METHODS

2 The conceptual framework used in Australia's Labour Force Survey aligns closely with the standards and guidelines set out in Resolutions of the International Conference of Labour Statisticians. Descriptions of the underlying concepts and structure of Australia's labour force statistics, and the sources and methods used in compiling the estimates, are presented in *Labour Statistics: Concepts, Sources and Methods* (Cat. no. 6102.0) which is also available on the ABS website www.abs.gov.au (Statistics—Statistical Concepts Library).

MONTHLY POPULATION SURVEY

3 The population survey is based on a multi-stage area sample of private dwellings (currently about 30,000 houses, flats, etc.) and a list sample of non-private dwellings (hotels, motels, etc.), and covers about 0.5% of the population of Australia. The information is obtained from the occupants of selected dwellings by specially trained interviewers. The information obtained relates to the week before the interview (i.e. the reference week).

4 Households selected for the Labour Force Survey are interviewed each month for 8 months, with one eighth of the sample being replaced each month. The first interview is conducted face-to-face. Subsequent interviews are conducted by telephone (if acceptable to the respondent).

5 The interviews are generally conducted during the two weeks beginning on the Monday between the 6th and 12th of each month. Each year, to deal with operational difficulties involved with collecting and processing the Labour Force Survey around the Christmas and New Year holiday period, interviews for December start four weeks after November interviews start, and January interviews start five weeks after December interviews start. Occasionally, circumstances that present significant operational difficulties for survey collection can result in a change to the normal pattern for the start of interviewing.

6 Estimates from the Labour Force Survey are published first in this publication 31 days after the commencement of interviews for that month, with the exception of estimates for each December which are published 38 days after the commencement of interviews.

SCOPE OF SURVEY

7 The Labour Force Survey includes all persons aged 15 and over except members of the permanent defence forces, certain diplomatic personnel of overseas governments customarily excluded from census and estimated population counts, overseas residents in Australia, and members of non-Australian defence forces (and their dependants) stationed in Australia.

COVERAGE

8 In the Labour Force Survey, coverage rules are applied which aim to ensure that each person is associated with only one dwelling, and hence has only one chance of selection. The coverage rules are necessarily a balance between theoretical and operational considerations. Nevertheless, the chance of a person being enumerated at two separate dwellings in the survey is considered to be negligible.

EXPLANATORY NOTES

POPULATION BENCHMARKS

9 Labour Force Survey estimates are calculated in such a way as to add up to independent estimates of the civilian population aged 15 and over (population benchmarks). From February 1999, labour force estimates have been compiled using benchmarks based on the results of the 1996 Census of Population and Housing. Small revisions were made to many of the historical estimates from January 1995 to January 1999.

COMPARABILITY OF SERIES

10 From April 1986, the definition of employed persons was changed to include persons who worked without pay between 1 and 14 hours per week in a family business or on a farm (i.e. contributing family workers). For further information, see paragraphs 36 and 37 of the Explanatory Notes to the February 1987 issue of *Labour Force, Australia* (Cat. no. 6203.0).

11 The ABS introduced telephone interviewing into the Labour Force Survey in August 1996. Implementation was phased in for each new sample group from August 1996 to February 1997. During the period of implementation, the new method produced different estimates than would have been obtained under the old methodology. The effect dissipated over the final months of implementation and was no longer discernible from February 1997. The estimates for February 1997 and onwards are directly comparable to estimates for periods prior to August 1996. For further details, see the feature article in the June 1997 issue of *Labour Force, Australia* (Cat. no. 6203.0).

12 From April 2001 the Labour Force Survey has been conducted using a redesigned questionnaire containing additional data items and some minor definitional changes. Core labour force series were revised for the period April 1986 to March 2001 to ensure continuity. For further details, see *Information Paper: Implementing the Redesigned Labour Force Survey Questionnaire* (Cat. no. 6295.0) and *Information Paper: Questionnaires Used in the Labour Force Survey* (Cat. no. 6232.0).

SURVEY SAMPLE REDESIGN

13 The Labour Force Survey sample was last reselected using information collected in the 1996 Census of Population and Housing.

14 The bulk of the new sample was phased in over the period September 1997 to April 1998, with one eighth of this portion of the sample being introduced every month. The remainder of the sample (about 15% of the total), which covers less settled areas of Australia and non-private dwellings was rotated in full for New South Wales, Victoria, Tasmania, Northern Territory and Australian Capital Territory in September 1997, and for Queensland, South Australia and Western Australia in October 1997. Such a pattern of implementation means that any changes to labour force estimates due to differences between the two samples, or any other influences, were spread over the eight months.

15 For further details, see *Information Paper: Labour Force Survey Sample Design* (Cat. no. 6269.0).

EXPLANATORY NOTES

RELIABILITY OF ESTIMATES

16 Two types of error are possible in an estimate based on a sample survey: sampling error and non-sampling error.

Sampling error occurs because a sample, rather than the entire population, is surveyed. One measure of the likely difference resulting from not including all dwellings in the survey is given by the standard error. There are about two chances in three that a sample estimate will differ by less than one standard error from the figure that would have been obtained if all dwellings had been included in the survey, and about nineteen chances in twenty that the difference will be less than two standard errors. Standard errors of estimates for the latest month and of estimates of movements since the previous month are shown on pages 31 and 32. Standard errors of other estimates and other movements may be determined by using information in the Technical Notes in *Labour Force, Australia* (Cat. no. 6203.0).

Non sampling error arises from inaccuracies in collecting, recording and processing the data. Every effort is made to minimise reporting error by the careful design of questionnaires, intensive training and supervision of interviewers, and efficient data processing procedures.

SEASONAL ADJUSTMENT AND TREND ESTIMATION

17 Seasonally adjusted series are published in Tables 2, 5 and 12 to 17. Seasonal factors are reviewed annually to take account of each additional year's original data. The results of the latest review were used to compile the seasonally adjusted and trend estimates given in this publication. Information about the last annual review of seasonal factors was published in a feature article in the February 2002 issue of *Labour Force, Australia* (Cat no. 6203.0).

18 Seasonal adjustment is a means of removing the estimated effects of normal seasonal variation from the series so that the effects of other influences on the series can be more clearly recognised. Seasonal adjustment does not aim to remove the irregular or non-seasonal influences which may be present in any particular month. This means that month-to-month movements of the seasonally adjusted estimates may not be reliable indicators of trend behaviour. For example, irregular factors unrelated to the trend account for more than half the seasonally adjusted movement with the following frequency:

Employment: 6 in 10 monthly movements

Unemployment: 8 in 10 monthly movements

Unemployment rate: 8 in 10 monthly movements

Participation rate: 9 in 10 monthly movements.

19 The smoothing of seasonally adjusted series reduces the impact of the irregular component of the seasonally adjusted series, and creates trend estimates. These trend estimates are derived by applying a 13-term Henderson-weighted moving average to all months except the last six. The last six monthly trend estimates are obtained by applying surrogates of the Henderson average to the seasonally adjusted series. Trend series are used to analyse the underlying behaviour of the series over time. These are published in tables 3, 6 and 12 to 19.

20 While this smoothing technique enables estimates to be produced for the latest month, it does result in revisions to the most recent months as additional observations become available. Generally, subsequent revisions become smaller, and after three months have a negligible impact on the series. There will also be revisions as a result of the annual review of seasonal factors.

EXPLANATORY NOTES

SEASONAL ADJUSTMENT AND TREND ESTIMATION *continued*

21 Trend estimates are published for the Northern Territory in table 18 and for the Australian Capital Territory in table 19. Unadjusted series for the two Territories have shown, historically, a high degree of variability, which can lead to considerable revisions to the seasonally adjusted estimates after each annual seasonal factor re-analysis. Seasonally adjusted estimates are not currently published for the two Territories. The most recent six months trend estimates are subject to revision. For the three most recent months, the revision may be relatively large. Inferences about trends drawn from smoothed seasonally adjusted (trend) estimates for months earlier than the latest three months are unlikely to be affected by month to month revisions. They may be affected by revision resulting from the annual re-analysis of seasonal factors.

22 For further information, see *A Guide to Interpreting Time Series—Monitoring 'Trends': an Overview* (Cat. no. 1348.0) or contact the Assistant Director, Time Series Analysis on (02) 6252 6345.

RELATED PUBLICATIONS

23 Users may also wish to refer to *Labour Force, Australia* (Cat. no. 6203.0). This publication contains a detailed list of related publications which are available from ABS Bookshops.

24 Current publications produced by the ABS are listed in the *Catalogue of Publications and Products* (Cat. no. 1101.0). The ABS also issues, on Tuesdays and Fridays, a *Release Advice* (Cat. no. 1105.0) which lists publications to be released in the next few days. The Catalogue and Release Advice are available from any ABS office.

DATA AVAILABLE ON REQUEST

25 As well as the statistics included in this and related publications, the ABS may have other relevant data available. Inquiries should be made to Narrisa Gilbert on 02 6252 5283 or to any ABS office.

EFFECTS OF ROUNDING

26 Estimates have been rounded and discrepancies may occur between sums of the component items and totals.

27 Estimates of movement shown in this publication are obtained by taking the difference of unrounded estimates. The movement estimate is then rounded to one decimal place. Therefore where a discrepancy occurs between the reported movement and the difference of the rounded estimates, the reported movement will be more accurate.

SYMBOLS AND OTHER USAGES

* subject to sampling variability too high for most practical uses. See the Technical Notes in Cat. no. 6203.0 for more details.

GLOSSARY

| | |
|---|--|
| Actively looking for work | Includes writing, telephoning or applying in person to an employer for work; answering an advertisement for a job; checking factory noticeboards or the touchscreens at the Centrelink offices; being registered with Centrelink as a jobseeker; checking or registering with any other employment agency; advertising or tendering for work; and contacting friends or relatives. |
| Attending school | Persons aged 15 to 19 years enrolled at secondary or high school in the reference week. |
| Attending tertiary educational institution full time | Persons aged 15 to 24 years enrolled full time at a TAFE college, university, or other educational institution in the reference week, except those persons aged 15 to 19 years who were still attending school. |
| Civilian population aged 15 years and over | All usual residents of Australia aged 15 years and over except members of the permanent defence forces, certain diplomatic personnel of overseas governments customarily excluded from census and estimated population counts, overseas residents in Australia, and members of non-Australian defence forces (and their dependants) stationed in Australia. |
| Employed | <p>All persons aged 15 years and over who, during the reference week:</p> <ul style="list-style-type: none"> ■ worked for one hour or more for pay, profit, commission or payment in kind in a job or business, or on a farm (comprising employees, employers and own account workers); or ■ worked for one hour or more without pay in a family business or on a farm (i.e. contributing family workers); or ■ were employees who had a job but were not at work and were: <ul style="list-style-type: none"> ■ away from work for less than four weeks up to the end of the reference week; or ■ away from work for more than four weeks up to the end of the reference week and received pay for some or all of the four week period to the end of the reference week; or ■ away from work as a standard work or shift arrangement; or ■ on strike or locked out; or ■ on workers' compensation and expected to return to their job; or ■ were employers or own account workers, who had a job, business or farm, but were not at work. |
| Full-time workers | Employed persons who usually worked 35 hours or more a week (in all jobs) and those who, although usually working less than 35 hours a week, worked 35 hours or more during the reference week. |
| Labour force | For any group, persons who were employed or unemployed, as defined. |
| Labour force status | A classification of the civilian population aged 15 years and over into employed, unemployed or not in the labour force, as defined. The definitions conform closely to the international standard definitions adopted by the International Conferences of Labour Statisticians. |
| Not in the labour force | Persons who were not in the categories employed or unemployed as defined. |
| Participation rate | For any group, the labour force expressed as a percentage of the civilian population aged 15 years and over in the same group. |
| Part-time workers | Employed persons who usually worked less than 35 hours a week (in all jobs) and either did so during the reference week, or were not at work in the reference week. |

G L O S S A R Y

| | |
|--|---|
| Seasonally adjusted series | A time series of estimates with the estimated effects of normal seasonal variation removed. See Explanatory Notes 17 and 18 for more detail. |
| Trend series | A smoothed seasonally adjusted series of estimates. See Explanatory Notes 19 to 21 for more detail. |
| Unemployed | Persons aged 15 years and over who were not employed during the reference week, and: <ul style="list-style-type: none"> ■ had actively looked for full-time or part-time work at any time in the four weeks up to the end of the reference week and: <ul style="list-style-type: none"> ■ were available for work in the reference week; or ■ were waiting to start a new job within four weeks from the end of the reference week and could have started in the reference week if the job had been available then. |
| Unemployed looking for full-time work | Unemployed persons who: <ul style="list-style-type: none"> ■ actively looked for full-time work and were available for work in the reference week; or ■ actively looked for work and were not available for work in the reference week because they were waiting to start a new full-time job. |
| Unemployed looking for part-time work | Unemployed persons who: <ul style="list-style-type: none"> ■ actively looked for part-time work only and were available for work in the reference week; or ■ actively looked for work and were not available for work in the reference week because they were waiting to start a new part-time job. |
| Unemployment rate | For any group, the number of unemployed persons expressed as a percentage of the labour force in the same group. |
| Unemployment to population ratio | For any group, the number of unemployed persons expressed as a percentage of the civilian population in the same group. |

STANDARD ERRORS

The estimates in this publication are based on information gained from the occupants of a sample survey of dwellings. Because the entire population is not surveyed, the published estimates are subject to sampling error. The most common way of quantifying such sampling error is to calculate the standard error for the published estimate or statistic.

LEVEL ESTIMATES

To illustrate, let us say the published level estimate for employed persons aged 15 to 19 is 500,000. The calculated standard error in this case is 8,700. The standard error is then used to interpret the level estimate of 500,000. For instance, the standard error of 8,700 indicates that:

- There are approximately two chances in three that the real value falls within the range 491,300 to 508,700 (500,000 + or – 8,700)
- There are approximately nineteen chances in twenty that the real value falls within the range 482,600 to 517,400 (500,000 + or – 17,400).

The real value in this case is the result we would obtain if we could enumerate the total population.

The following tables show the standard errors for this month's level estimates.

STANDARD ERRORS *continued*

MOVEMENT ESTIMATES

The following example illustrates how to use the standard error to interpret a movement estimate. Let us say that one month the published level estimate for females employed part time in Australia is 1,390,000; the next month the published level estimate is 1,400,000. The calculated standard error for the movement estimate is 13,000. The standard error is then used to interpret the published movement estimate of 10,000. For instance, the standard error of 13,000 indicates that:

- There are approximately two chances in three that the real movement over the two month period falls within the range -3,000 to 23,000 (10,000 + or - 13,000)
- There are approximately nineteen chances in twenty that the real movement falls within the range -16,000 to 36,000 (10,000 + or - 26,000).

The following tables show the standard errors for this month's movement estimates.

| | EMPLOYED..... | | | UNEMPLOYED..... | | | Labour force | Not in labour force | Unemployment rate | Participation rate |

WHAT IF...? REVISIONS TO TREND ESTIMATES

EFFECT OF NEW SEASONALLY ADJUSTED ESTIMATES ON TREND ESTIMATES

TREND REVISIONS

Each time new seasonally adjusted estimates become available, trend estimates are revised (see paragraphs 19 and 20 of Explanatory Notes).

The examples in the tables below show four illustrative scenarios and the consequent revisions to previous trend estimates of employment and unemployment rate.

- 1** The June seasonally adjusted estimate is the same as the May estimate.
- 2** The June seasonally adjusted estimate is higher than the May estimate by:
 - +0.30% for employment
 - +1.84% for the unemployment rate
- 3** The June seasonally adjusted estimate is lower than the May estimate by:
 - -0.30% for employment
 - -1.84% for the unemployment rate
- 4** The June seasonally adjusted estimate results in a revised May trend estimate which is identical to the new June trend estimate.

The percentage changes of 0.30% and 1.84% were chosen because they represent the average absolute monthly percentage changes in employment and the unemployment rate respectively.

EMPLOYMENT ('000)

| | | WHAT IF NEXT MONTH'S SEASONALLY ADJUSTED ESTIMATE IS: | | | |
|--------------------|---------|---|-----------------------------------|-----------------------------------|---|
| | | 1 | 2 | 3 | 4 |
| | | 9 305.2 i.e. the same as May 2002 | 9 332.7 i.e. rises by 0.30% | 9 277.6 i.e. falls by 0.30% | 9 267.5 i.e. same trend for May & Jun |
| Trend as Published | | | | | |
| 2002 | | | | | |
| March | 9 282.3 | 9 281.6 | 9 282.8 | 9 280.4 | 9 279.9 |
| April | 9 294.3 | 9 292.6 | 9 296.7 | 9 288.6 | 9 287.1 |
| May | 9 302.7 | 9 300.9 | 9 308.5 | 9 293.2 | 9 290.4 |
| June (new) | — | 9 306.2 | 9 317.8 | 9 294.6 | 9 290.4 |

UNEMPLOYMENT RATE (%)

| | | WHAT IF NEXT MONTH'S SEASONALLY ADJUSTED ESTIMATE IS: | | | |
|--------------------|-----|---|-------------------------------|-------------------------------|---|
| | | 1 | 2 | 3 | 4 |
| | | 6.3 i.e. the same as May 2002 | 6.4 i.e. rises by 1.84% | 6.2 i.e. falls by 1.84% | 6.7 i.e. same trend for May & Jun |
| Trend as Published | | | | | |
| 2002 | | | | | |
| March | 6.4 | 6.5 | 6.5 | 6.4 | 6.5 |
| April | 6.3 | 6.3 | 6.4 | 6.3 | 6.4 |
| May | 6.2 | 6.3 | 6.3 | 6.2 | 6.4 |
| June (new) | — | 6.2 | 6.2 | 6.2 | 6.4 |

FOR MORE INFORMATION...

| | |
|-------------------------|---|
| <i>INTERNET</i> | www.abs.gov.au the ABS web site is the best place to start for access to summary data from our latest publications, information about the ABS, advice about upcoming releases, our catalogue, and Australia Now—a statistical profile. |
| <i>LIBRARY</i> | A range of ABS publications is available from public and tertiary libraries Australia-wide. Contact your nearest library to determine whether it has the ABS statistics you require, or visit our web site for a list of libraries. |
| <i>CPI INFOLINE</i> | For current and historical Consumer Price Index data, call 1902 981 074 (call cost 77c per minute). |
| <i>DIAL-A-STATISTIC</i> | For the latest figures for National Accounts, Balance of Payments, Labour Force, Average Weekly Earnings, Estimated Resident Population and the Consumer Price Index call 1900 986 400 (call cost 77c per minute). |

INFORMATION SERVICE

Data which have been published and can be provided within five minutes are free of charge. Our information consultants can also help you to access the full range of ABS information—ABS user-pays services can be tailored to your needs, time frame and budget. Publications may be purchased. Specialists are on hand to help you with analytical or methodological advice.
